

PROOF OF WORK.

"The most powerful statement is a number
that refuses to apologize."

FORMAT

70" TV · 1920×1080
Silent · Looping

DURATION

90 seconds
Seamless loop

AUDIENCE

Community bankers
CU execs · Fintech ops

PRODUCTION COST

\$0 · Free tools only

VISUAL DNA

Stealth mono
Black · White · Amber

THE CREATIVE PHILOSOPHY

Steve Jobs never showed a feature list. He showed one thing that made everything else impossible. The Macintosh read its own name. The iPod was 1,000 songs — three words.

This video does the same. It does not explain TheoremLabs. It proves it. Five numbers. Three products. One theorem. The bankers walking past your booth at FinZpire will not stop for a pitch deck. They will stop for \$6,000 appearing, alone, in white, on a black screen — because it contradicts everything they believe possible.

THE MANDATE

FORMAT
70" TV, 1920×1080, looping, silent
DURATION
90 seconds, seamless loop
AUDIENCE
Community bankers, CU execs, fintech ops leaders
DESIRED ACTION
Stop walking. Scan the QR code. Talk to a TheoremLabs person.
VISUAL DNA
Stealth mono: near-black, white type, amber accent on key moments
tone
Cold precision that becomes warm inevitability

THE 90-SECOND TIMELINE

ACT I 0:00-0:15	BREAK :15-:20	ACT II 0:20-0:50	ACT III 0:50-1:15	CTA 1:15-1:30
--------------------	------------------	---------------------	----------------------	------------------

ACT-BY-ACT BREAKDOWN

ACT I

The Weight — the world bankers live in today

0:00 - 0:15

Pure kinetic typography. White text appearing line by line on a near-black background, each line stamping itself onto the screen like a ledger entry. The brutal arithmetic of the status quo — no music, no motion graphics. Just the numbers.

SCREEN TEXT — APPEARS ONE LINE AT A TIME

18 months to deploy a new system.
\$200,000 per process, per year.
Still waiting on IT.

// VISUAL

Slow-motion abstract: financial documents dissolving into data dust. Static camera drift on dark texture. Text is dominant, video is atmosphere only.

BREAK

The Theorem — the pivot moment

0:15 - 0:20

A single amber hexagon assembles at screen center from six geometric shards. It holds for two seconds. A single line of text appears beneath it.

SCREEN TEXT

There is a better theorem.

// VISUAL

Macro CGI: crystalline hexagonal formation in amber/gold (#D4840A) on black void. Each face clicks into place. Holds 1s. Cut.

ACT II

The Three Agents — Front, Middle, Back Office

0:20 - 0:50

Three 10-second beats. Abstract video establishes the problem domain, then text names the agent and its mandate. The products do not explain themselves — they announce themselves.

BEAT A · 0:20-0:30 · PROMPTLINE · FRONT OFFICE

PromptLine. Calls answered. 24/7. EN + ES. From day one.

BEAT B · 0:30-0:40 · TACIT · BACK OFFICE

Tacit. KYC. KYB. Documents. Reconciled. Clean.

BEAT C · 0:40-0:50 · PRAHARI · THE SENTINEL

Prahari. Every agent. Every transaction. Every regulation. Watched.

ACT III The Theorem — five numbers that change everything

0:50 - 1:15

The Steve Jobs moment. Five numbers get their own stage, one at a time. Each arrives large and holds for 3 seconds. A secondary context line fades in. Then cut. A drumbeat of proof.

\$6,000

per agent · per year
vs \$80K-\$200K legacy

2 weeks.

LOOP →

Seamless crossfade
returns to Act I opening

// VISUAL Each number: pure black background. Subtle hexagonal grid texture breathing slowly underneath. The number IS the video. 5 seconds per card.

CTA The Invitation — TheoremLabs brand resolution

1:15 - 1:30

The TheoremLabs hexagonal logomark assembles slowly from particles. The tagline appears. Then the CrowdPuller call-to-action — a reason to act right now.

SCREEN TEXT — STAGGERED REVEAL

Your AI Products.

Deployed in Weeks. Not Years.

theorem labs.io · FinZpire 2026 · Charlotte, NC

→ Scan the placard. Get your AI agent. In 60 minutes.

// VISUAL Logo assembles. Slow fade to 80% black — tagline glows. Loop crossfades back to Act I opening at exactly 0:00.

ALIGNMENT CHECKLIST

Please confirm or annotate each item before production begins.

Creative direction	Proof-of-Work concept: no voiceover, no UI demos, no stock footage — five numbers + three products + one tagline. ☐ Approve
Visual aesthetic	Stealth mono (near-black + white + amber accent). Consistent with existing brochure and CrowdPuller placard brand. ☐ Approve
Products featured	PromptLine, Tacit, Prahari — mapped to front/middle/back office. Other products (DataGaze, KnowledgePulse etc.) intentionally excluded to avoid diluting impact. ☐ Approve
Key stat updated	Agent cost shown as \$6,000/year (updated from earlier draft). Confirmed throughout all scenes and prompts. ☐ Confirm
CrowdPuller CTA	Video resolves with a reference to the booth placard QR scan — bridging 70" TV visual to the physical lead-capture activation. ☐ Approve
Production budget	\$0 total. Veo 3 (AI Studio free tier), Kling AI (166 credits/month free), DaVinci Resolve (free, no watermark), CapCut Desktop (free). ☐ Confirm
Delivery format	H.264 MP4, 1920×1080, 50 Mbps, loop-tested. Delivered on USB drive to venue AV team. TV set to auto-play, sleep mode disabled. ☐ Approve

NEXT STEPS

Once alignment is confirmed on all items above, the next deliverables are:

1. Edit Decision List (EDL) — a frame-by-frame assembly script formatted for DaVinci Resolve, with exact clip durations, transition types, and color grade settings per scene.
2. Motion preview — an in-browser HTML prototype of the Act III number sequence so you can feel the 5-second pacing rhythm before generating any video assets.
3. CapCut template export — a prebuilt text animation template file with the exact font, size, color, and easing settings for the kinetic typography scenes.
