

Your UBPR Data Is a *Strategic Asset*. Is It Working For You?

Every community bank files Uniform Bank Performance Reports. Yet most treat UBPR as a compliance artifact — not the real-time intelligence engine it can be. Vantage Bank has changed that.

- 01 **UBPR is dense and backward-looking.** Hundreds of fields, quarterly cadence — no team has bandwidth to extract actionable signals before the next exam.
- 02 **Peer benchmarking takes analyst hours.** By the time your team produces a peer group comparison, the strategic window to act has closed.
- 03 **Regulatory inflection points go undetected.** Ratio drift and emerging exam sensitivities are buried in raw data that no one has time to read.
- 04 **Building in-house is not an option.** A custom analytics platform requires 18+ months and a team you don't have. Compliance expertise must be built in from day one.

Vantage Bank Built the Solution — And Is Opening It to Partner Banks.

Through the Vantage Collabs Software Developer Program, banks can now access UBPR Intelligence — a production AI application built jointly with Theoremlabs — as a ready-to-deploy capability.

UBPR INTELLIGENCE

Software Developer Collabs

AI-Powered · Production-Ready

v1.0 · 2026

An AI-native application that transforms a community bank's raw UBPR data into exam-ready insights, real-time peer benchmarks, and strategic performance signals — deployed in weeks, not months.

CORE CAPABILITIES

- 

AI Peer Benchmark Engine
Automated peer group selection + real-time ratio comparison across 60+ UBPR metrics. Board-ready in one click.

Core
- 

Regulatory Trend Alerting
Monitors ratio drift, flags exam-sensitive thresholds, and surfaces emerging risk signals before regulators arrive.

Core
- 

Strategic Performance Narrative
LLM-generated plain-English summaries: what your UBPR says, what it means, and what to do about it.

AI
- 

Exam Preparation Module
Auto-generates response narratives for top exam areas — capital adequacy, asset quality, earnings, liquidity — keyed to your ratios.

~\$5B Assets · FDIC Insured
5-Star Rated · Cloud-Native

Vantage Bank's Collabs program is the fastest path for community and regional banks to access bank-grade embedded finance, modern correspondent services, and joint AI products — without building the infrastructure alone.

WHAT VANTAGE COLLABS DELIVERS TO PARTNER BANKS

- 

Modern Correspondent Banking
Tokenized deposits, FX, loan syndications, and global payment rails with real-time oversight and bank-owned data.
- 

Programmable Payments Hub
ACH, wires, and real-time settlement with smart routing, automated posting, and audit-ready logs.
- 

FDIC-Insured Programmable Ledger
Virtual accounts, FBO structures, and IntraFi extended insurance — bank-controlled, compliance built in.
- 

Joint AI Products · Software Developer Collabs
Co-developed AI apps — like UBPR Intelligence — built and deployed through Vantage Collabs. Available to partner banks now.

IDEAL PARTNER BANK PROFILE

Asset Size
\$500M - \$5B community or regional bank

Geography
Texas-first, expanding nationally

Mindset
Innovation-led; compliance-forward culture
