The New Software Era

Hybrid management consulting and AI build & experimentation labs
for Fintech products powered by AI, Data, Cloud & Web3

• Charlotte, NC • theoremlabs.io • Est. 2025

Who We Are

Bridging Vision & Execution

Theoremlabs blends management consulting with build & experimentation labs, offering tailored solutions for Fintech products. We leverage AI, Data, Cloud, and Web3 technologies to deliver innovative, scalable, and future-ready financial solutions, bridging the gap between vision and execution.

Flagship Products

Our Services

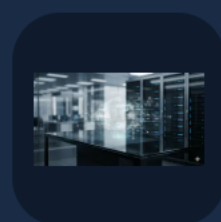

Three Pillars of Excellence

A unified approach to AI transformation — strategy, experimentation,
and acceleration

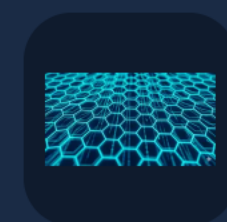

Advisory & Consulting

Strategic management consulting for Fintech enterprises navigating the AI transformation landscape.

Art of Possible Labs

A rapid experimentation and prototyping lab where ideas become production-ready AI solutions.

Accelerators

Purpose-built AI accelerators that compress months of development into weeks for Fintech use cases.

Why Theoremlabs

What Sets Us Apart

Five competitive advantages that make Theoremlabs the right partner

Battle-Hardened Experts

Seasoned practitioners who have shipped production AI systems in regulated Fintech environments.

Walk the Talk

We build the same solutions we recommend — no theoretical advice, only proven approaches.

Lean & Agile Teams

Small, expert-dense squads that move fast without sacrificing quality or compliance.

Risk-Literate AI

Deep understanding of financial risk, compliance, and regulatory requirements in AI deployment.

Prime Location

Headquartered in Charlotte, NC — the second-largest financial hub in the United States.

Flagship Product

Kirdar.ai

The next-generation employee training simulator that transforms how organisations develop talent through AI-powered experiential learning.

- AI-powered role-play scenarios for realistic, immersive training
- Identifies individual skill gaps with precision analytics
- Accelerates onboarding — new employees ramp faster
- Personalised adaptive learning paths driven by AI
- Scales across global teams without additional headcount

Fintech

Flagship Product

DataGaze.ai

An intelligent data observability and analytics platform built for the complexity and compliance demands of modern Fintech organisations.

Real-Time Monitoring

Live dashboards that surface critical signals instantly

Predictive Analytics

AI-driven forecasting for Fintech decision-making

Data Lineage

Full transparency into data provenance and flows

Compliance Reporting

Automated regulatory reports and audit trails

Product

PromptLine

Conversational AI Phone & Text

AI-powered voice and text interfaces that handle customer queries, route complex cases, and integrate with core banking systems — 24/7, without agent involvement.

- Resolve 70%+ of inquiries without agent involvement
- Go live on voice & SMS in days — not months
- Full compliance audit trail for every conversation

WHERE PROMPTLINE GOES TO WORK

Account Inquiries

Balance checks and transaction history resolved instantly — 24/7, without agent involvement.

Collections & Reminders

Proactive outreach that negotiates payment arrangements and logs outcomes automatically.

Appointment Scheduling

Book branch visits and advisor calls through voice or text — integrated with your calendar.

Loan & Credit Queries

Answer eligibility questions and guide customers through next steps with zero wait time.

KYC & Identity Verification

Guide customers through identity workflows conversationally, reducing abandonment.

Fraud Alerts & Confirmations

Reach customers instantly on suspicious activity. Confirm or dispute in one secure conversation.

Accelerator 1 of 10

INTELLIGENT DATA RECONCILIATION

ReconcileAI

“Automate complex reconciliation processes with AI precision”

OVERVIEW

Automates the end-to-end reconciliation process across financial, inventory, and compliance data. Using a blend of rules and AI, it matches large datasets, flags discrepancies, and generates audit-ready summaries — accelerating close cycles and reducing manual workloads.

IDEAL FOR

Banks, fintechs, and enterprise accounting teams

KEY CAPABILITIES

- Automated matching and exception handling
- AI-powered anomaly detection
- Multi-source data reconciliation
- Audit-ready reporting and compliance
- Accelerated close cycles

PROVEN RESULTS

FinTech / Payments

Accelerator 2 of 10

DYNAMIC KNOWLEDGE MANAGEMENT

KnowledgePulse

“Turn tribal knowledge into intelligent support systems”

OVERVIEW

Converts static documents and support material into a dynamic, searchable knowledge base. Powered by RAG and NLP, it drives intelligent FAQs, contextual help, and customer support bots. As documentation evolves, the knowledge base updates automatically — ensuring real-time accuracy.

IDEAL FOR

SaaS, enterprise IT, and service organizations

KEY CAPABILITIES

- Dynamic, searchable knowledge base
- AI-powered FAQ generation
- Real-time accuracy and updates
- RAG architecture with vector search
- Integrated chatbot support

LEGACY SYSTEM KNOWLEDGE EXTRACTION

InsightBridge

“Bridge the gap between old infrastructure and modern AI workflows”

OVERVIEW

Extracts and modernizes knowledge trapped in legacy systems — mainframes, aging databases, and undocumented codebases. InsightBridge creates a structured, queryable knowledge layer on top of your existing estate so teams can move forward without starting from scratch.

IDEAL FOR

Enterprises with legacy mainframes, aging core systems, or undocumented codebases

KEY CAPABILITIES

- Legacy system knowledge extraction
- Automated documentation generation
- Structured knowledge graph output
- Integration with modern AI workflows
- Reverse engineering of undocumented logic

PROVEN RESULTS

Enterprise Modernization

Accelerator 4 of 10

PRIVACY-SAFE DATA GENERATION

SyntheticEdge

“Build AI without the data privacy headache”

OVERVIEW

Generates realistic, PII-safe synthetic datasets to accelerate AI development in regulated environments. It simulates customer behavior, anomalies, and edge cases while ensuring zero real data exposure. Teams build, test, and iterate AI models without waiting for data approval.

IDEAL FOR

Healthcare, banking, and insurance sectors with sensitive data requirements

KEY CAPABILITIES

- PII-safe synthetic data generation
- Realistic behavior simulation
- Edge case and anomaly modeling
- Support for structured and unstructured formats
- ML platform integrations

PROVEN RESULTS

CONVERSATIONAL AI PHONE & TEXT

PromptLine

“Intelligent voice and text interfaces for financial services”

OVERVIEW

AI-powered voice and text interfaces that handle customer queries, route complex cases, and integrate with core banking systems — 24/7, without agent involvement. Replaces rigid IVR systems with natural, contextually aware conversations that resolve issues in real time.

IDEAL FOR

Banks, credit unions, and financial services with high inbound call or SMS volume

KEY CAPABILITIES

- Natural AI voice call handling
- SMS and text automation
- Intelligent call routing and escalation
- Core banking system integration
- Compliance audit trails for every conversation

PROVEN RESULTS

Financial Services

CENTRALIZED CUSTOMER COMMUNICATIONS

Shared Service Marketplace

"Automate 20+ operations-driven communications from one place"

OVERVIEW

Centralizes customer communication workflows — NSF notices, maturity reminders, tax statements, and more — into a single branded, compliance-ready hub. Triggers messages across email, SMS, and print from one platform, standardizing communications across lines of business.

IDEAL FOR

Banks, credit unions, and insurers looking to modernize customer communications

KEY CAPABILITIES

- Centralized communication management
- Multi-channel delivery (email, SMS, print)
- Compliance-ready message templates
- Standardized branding and messaging
- Workflow automation and triggers

REGULATORY COMPLIANCE

Digital Twin

“Your virtual compliance analyst working 24/7”

OVERVIEW

An AI-powered digital twin that monitors regulatory changes and automates impact analysis. It identifies affected policies, controls, and stakeholders, drafts recommendations, and routes tasks for review — integrating with enterprise compliance platforms to orchestrate end-to-end response workflows.

IDEAL FOR

Compliance-heavy industries including finance, insurance, and healthcare

KEY CAPABILITIES

- Automated regulatory change monitoring
- AI-powered impact analysis
- Policy and control mapping
- Intelligent task routing and collaboration
- Comprehensive audit trails

PROVEN RESULTS

SIMPLIFY COMPLEX PRODUCT CONFIGURATIONS

Guided Selling App

“Help your customers configure exactly what they need”

OVERVIEW

Simplifies the customer decision journey for modular or complex product offerings. A natural language interface and visual builder map customer needs to the right configuration, giving sales reps and self-serve users tailored solution paths that shorten time-to-sale.

IDEAL FOR

Digital banking platforms, SaaS vendors, and modular B2B tech providers

KEY CAPABILITIES

- Interactive needs-based Q&A flow
- Visual solution building interface
- Natural language processing
- CRM integration and lead tracking
- Self-service and assisted selling modes

PROVEN RESULTS

Digital Banking Platform

CONVERSATIONAL WEB ASSISTANT

Chat-Web-30

“Your website, now talkable”

OVERVIEW

A web-embedded AI assistant that brings conversational UX to any website. Handles FAQs, directs users to forms, guides them through processes, and triggers calculators or actions — enhancing self-service experiences and increasing conversion by removing friction from navigation.

IDEAL FOR

Education, financial services, government, and ecommerce sectors

KEY CAPABILITIES

- Conversational website navigation
- Intelligent FAQ handling
- Form guidance and completion support
- Process walkthrough assistance
- Calculator and action triggers

PROVEN RESULTS

SECURE DOCUMENT UPLOAD

Workflow Assist

“Secure file intake with workflow intelligence”

OVERVIEW

A secure, user-friendly portal for document collection linked to internal workflows. Whether for KYC, onboarding, or audits, users upload files with real-time validation while backend systems receive structured, tagged data. Improves intake speed, reduces manual errors, and strengthens compliance.

IDEAL FOR

Lending, insurance, education, and HR departments

KEY CAPABILITIES

- Secure document collection portal
- Real-time validation and tagging
- Workflow integration and routing
- Status notifications and tracking
- Enhanced compliance tracking

PROVEN RESULTS

Lending & Credit

58 → 94%

3-Day Collection Rate

Advisory & Consulting

Strategy Meets Execution

We don't just advise — we roll up our sleeves and build alongside you

AI Strategy & Roadmapping

Define your AI transformation journey with a clear, executable roadmap tailored to Fintech.

Operating Model Design

Redesign processes and org structures to embrace AI-native ways of working.

Technology Due Diligence

Evaluate AI vendors, platforms, and architectures with practitioner rigour.

Change Management

Guide leadership and teams through cultural and workflow shifts that AI demands.

Regulatory & Risk Advisory

Navigate AI compliance in financial services — Model Risk, Fairness, Explainability.

Executive Education

Upskill C-suite and senior leaders on AI literacy, strategy, and competitive positioning.

Art of Possible Labs

Where Ideas Become Reality

A structured innovation methodology that turns ambitious ideas into working AI products

01

Discover

Deep-dive workshops to identify high-value AI opportunities within your organisation.

02

Prototype

Rapid, low-risk experiments that prove concepts in days — not months.

03

Validate

Rigorous testing with real data and users to confirm business value before scaling.

04

Launch

Production-grade deployment with full documentation, handover, and ongoing support.

Innovation: Coding Loops

From Copilot to Autopilot

The Agentic Shift 2026 framework — how teams move from AI assistance to AI autonomy

Copilot

Ralph Wiggum

Naive Persistence

Single long-running agent context. Simple but prone to context rot — degraded output quality as token windows fill.

Low Autonomy

Autopilot

Gas Town

Factory Pattern

Isolated, parallelised agent tasks. Each agent gets a fresh context window for a discrete function. Higher throughput.

Medium Autonomy

Agentic

Cherny / Team

Compound Engineering

Orchestrated multi-agent teams with specialised roles. Maximum quality and scalability for enterprise delivery.

Full Autonomy
